Skip loader VL

Skip loader VL is the latest new development in our skip loader range. We have concentrated on optimising weight, convenience, speed and safety. The basic design is a robust and proven folding jib skip loader built with experience gained over thirty years and with 1000 units delivered.

Skip loader VL is available with lifting capacities of 10, 12, 14 and 18 tons, in lengths suitable for a two-, three- and four-axle chassis. A hydraulically-extending platform is available as an option. This allows two containers to be loaded, for optimum transport economy. Suitable for simple use of hydraulic load securing.

- Robust** - sturdy construction
large bearing sleeves
- Versatile** - long reach
easy to operate
- Economical** - longer life, minimal maintenance

Equipment

Skip loader VL is available with many accessories for the highest degree of safety and the best operating economy. This means that we can always offer solutions for different needs and fields of application. The standard version of lift dumper VL includes telescopic support legs, electro-galvanised hydraulic pipework, solenoid valves in plastic housings, external operation and a cab control with 2 m cable for remote operation.

Option

- Rear extension for two containers
- High-tipping equipment
- Radio control
- Electro-pneumatic cab operation
- External hand throttle
- Wear plates or Hardox on the platform
- Lockable tipping hook
- Hydraulic load securing for one or two containers
- Safety lifting plates
- Cab-mounted control box
